Dispatch from the Demon World

A note from Christopher English

First of all, thank you for the overwhelming response to issue one. I've been writing and rewriting this story since 2017, so seeing it finally connect with readers means a lot to me.

When I first started, I was deep into ecchi manga and anime, and that heavily influenced the original version of Orio Isamu. I hired an artist on Fiverr to illustrate a few sample pages for a Kickstarter campaign, hoping to raise enough money to have the first issue drawn. Unfortunately, launching Kickstarters has never been my strong suit, and that one failed miserably.

Then, in 2022, AI gave me a reason to try again. I still wanted to tell this story, and I finally had a way to create the artwork myself. Getting characters to look consistent from one panel to the next, however, was a huge struggle. Content restrictions also meant I couldn't retain many of the original ecchi elements, so I rewrote the story with a stronger focus on romance and humor. Those elements eventually became the heart of the series.

That first attempt was a decent effort, but it wasn't the quality I had envisioned. I set it aside, though I never stopped thinking about it.

Fast-forward to 2026. After more revisions, I decided to give Orio another shot. AI had finally reached a point where I could achieve the style and consistency I needed to bring this manga to life the way I'd imagined it. So I remade the first issue, and the response surprised me. It resonated with far more of you than I expected.

And now, here we are: issue two.

I hope it makes you laugh, keeps you turning the pages, and gives you even more reasons to love these characters.

Drop me a line at christopher.english@outlook.com and let me know what you think. I'd love to include reader emails in the next issue, so let me know if you're comfortable having yours printed.

Thanks for giving Orio a chance. Enjoy!

Christopher English

I always dreamt what my first human kiss would be like.

In manga, the first kiss between the nerdy guy and the pretty girl is usually magical...

ゴッン

...in real life, not so much!
